Confidentiality Reasoning- Anti Dumping Petition – Measuring Tapes

SN	Issue/data	The reason/ justification for claiming confidentiality	Page No.	Remarks (note below)
1.	Petition Write-up	The petitioner is a private limited company. Price related information such as selling price, cost of production, profit/loss, return on investment, cash flow, quantum of price undercutting etc. and employee details are highly business sensitive information, disclosure of information would be of significant competitive advantage to our competitors and consumers. Disclosure of specific information with regard to price related parameters would seriously impact the petitioners in the market. This information would be of significant commercial interests to our competitors.	24, 25, 28, 30, 37, 38	No
2.	Proforma-IV-A - Price related information such as selling price, cost of production, profit/loss, return on investment, cash flow, etc. and employee details	The petitioner is a private limited company. Price related information such as selling price, cost of production, profit/loss, return on investment, cash flow, etc. and employee details are highly business sensitive information, disclosure of information would be of significant competitive advantage to our competitors and consumers. Disclosure of specific information with regard to price related parameters would seriously impact the petitioners in the market. This information would be of significant commercial interests to our competitors.	40	No
3.	Proforma IV B - Sales realization and quantum of price undercutting	Sales realization and quantum of price undercutting disclosure would be of significant competitive advantage to our competitors and consumers. Disclosure of this would lead to competitors and other consumers becoming aware of the prices quoted by the petitioner to particular customer. Knowledge of prices being charged by the petitioner can cause significant disadvantage to the petitioner in future negotiations with the customers.	43-47	No
4.	Annexure 2.2- Volume information of Supporters such as production and sales details	Disclosure of Volume information of supporters, who comprise private limited companies is business sensitive information, disclosure of this information would be of significant competitive advantage to our competitors and consumers.	67	No
5.	Annexure 3.1- elements of normal value calculations	Calculation of Normal Value - The information contained in this annexure is business sensitive information, disclosure of which would cause serious prejudice to the interests of the petitioner.	69-72	No
6.	Annexure 3.1- calculation of dumping margin	Calculation of dumping margin – Disclosure of this information would be of significant competitive advantage to our competitors and consumers.	69-72	No
7.	Annexure 5- Costing information	All annexures/enclosures are in the nature of information relating to cost & price of the domestic industry and are not susceptible to summarization.	165-174	No

8.	Annexure 6 - Annual Reports	Petitioner is a private limited company; disclosure of this information would seriously undermine business interest of the petitioner.	176-188	No

Note - Whether information is available in the public domain or with any Govt. authority from whom the same can be obtained by public with or without payment of fee.

Introduction

1. The present petition is being filed seeking an anti-dumping investigation into imports of Measuring Tapes(***"subject goods"***) from Chinese Taipei, Malaysia, Thailand & Vietnam (***"subject countries"***). Subject goods are being imported into India from Chinese Taipei, Malaysia, Thailand & Vietnam at dumped prices and in such volumes as to constitute dumping and cause material injury to the Indian domestic industry.
2. The present petition is being filed by M/s FMI Limited (***"petitioner"***), on behalf of the domestic producers of Measuring Tapes in India. The petitioner constitutes domestic industry for the product under consideration. It is submitted that the petitioner has adequate standing within the meaning of the Anti Dumping Rules to file the present petition. Petitioner has provided all relevant information that is reasonably available.
3. The petition is in the form and manner prescribed by the Authority and contains sufficient information to justify initiation of investigations and imposition of anti-dumping duties.
4. Petitioner requests the Hon'ble Designated Authority to kindly undertake anti-dumping investigation into imports of Measuring Tapes from Chinese Taipei, Malaysia, Thailand & Vietnam. Petitioner considers that the petition contains all relevant information warranting initiation of investigation. Should the Designated Authority, however, consider that the information is insufficient for the purpose of undertaking detailed investigations, petitioner may be appropriately directed. Petitioner is willing to provide any further information which may be required in this connection and which is reasonably available/ accessible to the petitioner. Petitioner requests the Designated Authority to kindly:

(a) initiate investigations to determine whether there is dumping of Measuring Tapes from Chinese Taipei, Malaysia, Thailand & Vietnam that is causing consequent injury to the domestic industry;
(b) advise the petitioner for any further information that the Designated Authority considers relevant and necessary for the present purpose;
(c) call relevant information from concerned parties, including information from the foreign producers, Indian consumers and other interested parties before arriving at a final decision;
(d) provide an opportunity to the domestic industry to further supplement their submissions on the need for anti-dumping duties, after the petitioner has received & reviewed the responses and information that is required to be provided by the other interested parties in general and foreign producers in particular;
(e) provide an opportunity for oral hearing;
(f) recommend interim anti dumping duty at the earliest, pending investigations;
(g) recommend imposition of anti dumping duty on imports of the product under consideration in India.

Anti dumping measures in force on Measuring Tapes imported from China

5. Imports of Measuring Tapes from China PR are at present subject to anti dumping measures. Definitive anti-dumping duties on measuring tapes imported from China PR were imposed by the Department of Revenue vide Notification No. 147/2003 dated 7th October, 2003. Thereafter the Authority initiated a sunset review investigation and the designated authority vide Notification No. 15/2/2008 – DGAD dated 27th March, 2009 concluded that anti dumping duties should be extended for a period of five years. The Designated Authority initiated the second sunset review investigations on 9th May. The Authority has concluded the case and duty has been recommended vide Notification No.15/9/2014-DGAD dated 5th May, 2015.

Section I

Imported Product Information

(1) Complete description of alleged dumped goods, including information on its size, quality, category and uses of such goods along with any applicable technical specifications or standards (national or international) and the tariff classification numbers, customs classification, customs duty, import policy (including Advance Licensing provisions)

A. Product Description

The product under consideration in the present petition is 'Measuring Tapes and its parts & components', originating in or exported from Chinese Taipei, Malaysia, Thailand and Vietnam. Measuring tapes can be of following types:-

a. Steel Tapes,
b. Fiberglass Tapes,
c. Metal wired Tapes.

Metal wired tapes are beyond the scope of the present petition. They are made of high quality copper wires.

Steel tapes are broadly divided into two types: -

a. Pocket tapes,
b. Other than pocket tapes

Pocket tapes can be of 2, 3 or 5 meters, while other tapes are larger than 5 meters. Large tapes can be of 10, 15, 20, 25, 30, meters etc. with different width. While

these are the lengths in which it is largely made, tapes can be made in other lengths also.

B. Production Technology and Manufacturing Process

Measuring Tapes are manufactured from tempered high quality carbon steel blade, phosphated and coated with special enamel to withstand corrosion and rust. Brief manufacturing process of Measuring Tapes is enclosed in Section VI with costing information.

C. Uses

Measuring Tapes are used in the following: -

a) high precision professional jobs;
b) measuring depth, width, or length of an object;
c) construction work and surveys.

Measuring Tapes are used by foremen, masons, carpenters, forestry departments and tailors etc. Essentially, as the name suggests, measuring tapes are used to "measure" dimensions and they can be found wherever measurement is required to be taken.

D. Unit of Measurement

The prescribed unit of measurement for the product under consideration is "numbers". Imports are reported in a large number of units of measurements, such as "no. of pieces", "dozens", "gross", or "kilograms".

The imports of the subject goods from China PR are attracting anti dumping duty. Entire analysis for the purpose of dumping margin, injury and injury margin was done in terms of weight at the time of previous investigations against China PR. Petitioner has considered the same unit of measurement for the purpose of determination of dumping margin, price undercutting and injury margin.

E. Technical specifications

Technical specifications of subject goods manufactured by the petitioner are enclosed as **Annexure 4**. Specifications of measuring tapes are defined in terms of the followings: -

a) Length of tape
b) Width of tape
c) Raw material used – steel or fiberglass and,

d) Precision with which dimensions are marked on the tape.

F. Tariff Classification

The subject goods is classified under Chapter 90 of the Customs Tariff Act. Complete classification of Chapter 90 in so far as it concerns imports of the product as per Customs Tariff Act is given in the table below.

Table 1: Tariff Classification

Chapter	Description
Chapter 90	Optical, Photographic, Cinematographic, Measuring, Checking, Precision, Medical or Surgical instruments and Apparatus; parts and Accessories thereof
90.17	Drawing, marking-out or mathematical calculating instruments (for example, drafting machines, pantographs, protractors, drawing sets, slide rules, disc calculators); instruments for measuring length, for use in hand, (for example, measuring rods and tapes, micrometers, calipers), not specified or included elsewhere in this chapter
9017.80	Other Instruments
9017.8010	Measuring Rods and Tapes and dividing scales
9017.9000	Other instruments: Parts and accessories

Transaction wise import information procured by the petitioner reveals that the product is being imported under various classifications such as 90171000, 90173010, 90173029, 90178010, 90178090, 90189099 etc.

Therefore, the said customs classifications are only indicative, and the same are not binding on the scope of the proposed investigations. Petitioner requests the Designated Authority to kindly specify that the anti dumping duty proposed is on the product description regardless of classification.

G. Customs duty

Customs duty on the imports of the product under consideration over the present injury period was as follows –

Table 2: Basic Customs duty over the years

Year	Customs Duty
2011-12	10%
2012-13	10%
2013-14	10%
2014-15	10%

Source: - Indian Customs Tariff Act, 1975

H. Import policy

Subject goods are imported freely into India. Imports of subject goods are not prohibited or restricted by any import policy. The product does not fall under restricted list.

I. Period of Investigation

The proposed period of investigation (POI) for the present investigation is April, 2014 – March, 2015 (12 Months). The injury investigation period has, however, been considered as the period, 2011-12, 2012-13, 2013-14 and the proposed POI.

(2) Countries of origin of the alleged dumped goods:

Producers/exporters from Chinese Taipei, Malaysia, Thailand and Vietnam (***"subject countries"***) are dumping the subject goods in the Indian market.

There has been a long history of continued dumping of the product under consideration from China PR for more than a decade. At present, imports of Measuring Tapes from China PR are attracting anti dumping duty and second sunset review investigations have been concluded by the Authority.

(3) Since when such goods from the named country (ies) is (are) being imported in the Indian market and when did dumping start.

The dumping of product under consideration from the subject countries has commenced in recent years. However, dumping of the product under consideration from China PR has continued for more than a decade now. Antidumping duties so imposed are still in force in case of imports of Measuring Tapes from China PR. This shows the vulnerability of the domestic industry.

(4) Whether such goods are shipped to India through third countries.
Subject goods are being directly shipped from the subject country. However, transshipments may not be ruled out. The Designated Authority may kindly investigate.

(5) Volume, value and avg. Cif value of such goods imported from other countries, not alleged to be dumping the goods, for the past two years and the current year to date and the source of information thereof

And

(6) Volume, value and avg.cif value of such goods imported from other countries, not alleged to dumping the goods, for the past two years and the current year to date and the source of information thereof.

As mentioned earlier, product is classified under customs chapter no. 90. Petitioner has collected transaction wise import information for the injury period from International Business Information Service, Mumbai (IBIS). Petitioner submits that the data provided by the DGCI&S does not reflect the required information in a segregated manner. Therefore, the same has cannot be relied upon. The address of IBIS is given below.

International Business Information Services
104-A, Raj Umang-1, Next to Maruti Nagar,
Ashokvan, Dahisar (East)
Mumbai-400 068

A statement showing country-wise imports of the subject goods as per secondary source is enclosed as Annexure 1.1. Grade-wise imports listing for the entire injury period is enclosed as Annexure 1.2.

(7) Name(s) and address (es) of known exporters and manufacturers of the alleged dumped goods in India.

Names and addresses of known exporters/manufacturers of the alleged dumped goods in the subject country are enclosed as Annexure 1.3.

(8) Name(s) and address (es) of known importers of the alleged dumped goods in India.

And

(9) Name(s) and address (es) of the users of the alleged dumped goods in India.

Names and addresses of known importers and users of the subject goods in India are enclosed as Annexure 1.4. The product is consumed by a very large number of consumers.

(10) Name(s) and address (es) of associations of the users of the alleged dumped goods in India.

There is no known association of users in India. The importers and industrial consumers may be members of apex associations such as FICCI, CII and ASSOCHEM.

Section II
Indian Industry

(1) Name(s), address(es), contact person, telephone numbers, and fax numbers of Indian producers of the subject goods who are lodging the complaint.

The present petition is being filed by M/s FMI Limited, who represents domestic industry of the product under consideration in India. Petitioner has provided all necessary information as required under the present petition and is willing to provide any further information which the Designated Authority may require during the course of the proposed investigation. Petitioner has consented for verification, which the Designated Authority may wish to carry out at their premises.

The petitioner has manufacturing facilities at Ludhiana; complete address of the petitioner along with the contact details is provided herein below:

Table 3: Details of Petitioner

FMI Limited Head Office: G. T. Road, Near Toll tax barrier Doraha, Ludhiana – 141421 Phone: 0161-3040001/02/03 Fax: 0161-3040022	Registered Office: Ferozepore Road, Ludhiana- 141001 Email- info@freemansgroup.com Contact Person: Mr. Shashi Jain General Manager

Letter from the petitioner is enclosed as Annexure 2.1.

(2) Name(s), address (es), contact person, telephone numbers, and fax numbers of Delhi office, if any, of Indian producers of the subject goods who are lodging the complaint.

Petitioner requests that all correspondences pertaining to this matter may kindly be addressed to their authorized representatives, whose details are given below. The petitioner has authorized M/s TPM Consultants to represent them in the present investigation. M/s. TPM Consultants is authorized inter-alia for the followings:

- To make submissions.
- To appear before the appropriate authority.
- To receive communications.

Complete address of TPM Consultants is as under:

Mr. A. K. Gupta, Mr. Praveen Khandelwal, Mr. Rajesh Sharma,Mr. K N Kothari
TPM Consultants
K-3/A, Saket,
New Delhi - 110 017
Telephone : 011-49892200 (4 lines)
Fax : 011-2685 9341
Email : akg@tpm.in; pkg@tpm.in; rajesh@tpm.in

It is requested that all correspondence in this matter may please be addressed to M/s. TPM Consultants at the address given above. Letter from the petitioner authorizing TPM Consultants is enclosed as *Annexure 2.1* with this petition.

(3) Name(s), address (es) of Indian producers other than complainant along with their production (volume and value) of subject goods during the last two years and the current year.

There are a number of producers of Measuring Tapes in India. M/s FMI Limited is the petitioner. Apart from the petitioner, other producers of the subject goods in India are listed below.

Table 4: Other producers of subject goods

Freemans Measures Limited G.T. Road, Jugiana Ludhiana – 141017 Ph- 0161-2511542-544 Fax- 0161-2444124 Email- samir@freemans.net	Klas Tape Co. 41, Sarang Street, Nagdevi Cross Lane, Mumbai-400003 Contact person: Sudhir Anand Email: klastapes@hotmail.com

New Wave Industries India B-IX/643 Hoshiarpur Road Jalandhar-4 Web: www.markerindia.com Contact person: Mr Chanderjit Singh Mob: +919356638000	

All these producers have extended support to the petition. Letters from these producers supporting the present petition are enclosed as Annexure 2.1. The information regarding their production is enclosed with this petition as Annexure 2.2.

(4) Whether viable substitute exists for the product, if so, please provide complete information about the substitutes and their degree of substitution.

There is no technically & commercially viable substitute for the product under consideration.

(5) Subject goods (including size, type, range, models) that petitioner(s) produces. Details of articles that petitioner(s) is/are capable of producing. Details of goods the petitioner(s) may purchase to complement the product line.

Details of the subject goods are provided in Section I of the petition. Petitioner is a multi-product company engaged in the production of a wide range of tapes and measures besides the product under consideration, details of which can be seen on the website of the petitioner company: www.freemansgroup.com. List of products produced by petitioner is given below:-

Hand Tools	**Measuring**
Pincers	Fibre Glass Tape measures
Cutters	Steel Tape Measures
Hammers	Metal wires Tape measures
Spanners, pliers, wrenches	Measuring wheels
Hacksaw frames, chisel and wrecking bars	High precision Spirit Levels
Masoc and carpenter tools	Telescopic measures, Cutters
Punches and Measuring Tool	
Lubricants	
Garden tools	
Leather Bags and Kits	
Taps and Dies	
Vices	

The petitioner is not purchasing any product or its grades to complement its product line of the product under consideration.

(6) (a) Do any of the petitioner(s) import the subject goods? If yes, please provide details of country wise volume and value of imports during the last two years and in the current year to date.
and

(b) Are any of the petitioners related to the exporters or importers of the alleged dumped article? If so, the nature of such relationship.

Petitioner has not imported the subject goods from the subject countries during the injury period. Further, the petitioner company is not related to any importer or exporter of subject goods in the subject countries. Details of exports by the petitioner are given in Proforma-IV-A enclosed with this petition.

(7) What are the differences in the petitioner's product and the alleged dumped product, if there are any. To the extent feasible, differences in the imported product and petitioner's product may be quantified.

With regard to like article, Rule 2(d) of the AD Rules provides as under: -

> *"like article" means an article which is identical or alike in all respects to the article under investigation for being dumped in India or in the absence of such article, another article which although not alike in all respects, has characteristics closely resembling those of the articles under investigation*;

There is no known difference in measuring tapes produced by the domestic industry and subject goods imported into India. Measuring tapes produced by the domestic industry and imported into India are comparable in terms of characteristics such as physical & chemical characteristics, manufacturing process & technology, functions & uses, product specifications, pricing, distribution & marketing and tariff classification of the goods. The two are technically and commercially substitutable. The consumers are using the two interchangeably.

In view of the above, petitioner submits that the subject goods produced by the domestic industry and imported from the subject countries are 'like articles' in accordance with the AD Rules.

(8) Please indicate any difference in the production process employed by the petitioner(s) and the exporters. It would be appropriate to quantify the impact of such differences, if any, on prices.

Petitioner understands that the technology and production process adopted by the domestic industry and the foreign producers are comparable. There is no significant difference in the technology employed by the domestic industry and producers in subject country. There is no significant difference in production process of various producers. However, every manufacturer fine-tunes its production process on the basis of necessities and available facilities.

(9) Volume of Indian production with a separate breakdown of petitioner and of other Indian producers not party to this complaint for the last past two completed years and current year to date.

With regard to 'domestic industry', Rule 2(b) of AD Rules defines domestic industry as under:-

"domestic industry" means the domestic producers as a whole engaged in the manufacture of the like article and any activity connected therewith or those whose collective output of the said article constitutes a major proportion of the total domestic production of that article except when such producers are related to the exporters or importers of the alleged dumped article or are themselves importers thereof in which case the term 'domestic industry' may be construed as referring to the rest of the producers ".

The present petition is being filed by M/s. FMI Ltd. A statement showing Indian production over the proposed injury period is enclosed as Annexure 2.2. It would be seen that production by the petitioner company constitutes the major proportion of Indian production of like article, comprising about 61% of the total production. The petition, therefore, satisfies the requirement of standing of the domestic industry under the AD Rules and the petitioner constitutes domestic industry within the meaning of the Anti Dumping Rules.

Section III
Evidence of Normal Value

A. Normal Value

Under Section 9A(1)(C), normal value in relation to an article means:

(i) the comparable price, in the ordinary course of trade, for the like article when meant for consumption in the exporting country or territory as determined in accordance with the rules made under sub-section (6); or

(ii) when there are no sales of the like article in the ordinary course of trade in the domestic market of the exporting country or territory, or when because of the particular market situation or low volume of the sales in the domestic market of the exporting country or territory, such sales do not permit a proper comparison, the normal value shall be either –

(a) comparable representative price of the like article when exported from the exporting country or territory or an appropriate third country as determined in accordance with the rules made under sub-section (6); or

(b) the cost of production of the said article in the country of origin along with reasonable addition for administrative, selling and general costs, and for profits, as determined in accordance with the rules made under sub-section (6):

Provided that in the case of import of the article from a country other than the country of origin and where the article has been merely transshipped through the country of export or such article is not produced in the country of export or there is no comparable price in the country of export, the normal value shall be determined with reference to its price in the country of origin.

According to the above, following can form the basis for determination of normal value in the exporting country:

a. The price of the like article in the domestic market of the exporting country in the ordinary course of trade.
b. Comparable representative prices of the like article when exported from the exporting country or territory or an appropriate third country.
c. The cost of production of the said article in the country of origin along with reasonable addition for administrative, selling and general costs, and for profits.

As discussed above, normal value means the price of the like article in the domestic market of the exporting country in the ordinary course of trade. In the instant case, normal value in the exporting country would thus imply price of Measuring Tapes in the domestic markets of the exporting subject country in the ordinary course of trade.

Normal Value in the subject countries

Chinese Taipei, Malaysia, Thailand and Vietnam ("subject countries") are market economy countries. Efforts were made to get any information about the price at which material is being traded in the domestic markets of Chinese Taipei, Malaysia, Thailand and Vietnam. Efforts were also made to get any other reasonable evidence of price prevailing in the subject countries. Petitioner has not been able to get evidence of selling prices of the product under consideration in the domestic markets of subject countries. Therefore, petitioner has been constrained to adopt constructed normal value approach for determination of normal value. Petitioner has determined normal value on the basis of cost of production in India, duly adjusted. The normal value has been determined for Steel and Fibre Glass Tapes separately owing to significant cost and price difference between the two types. Further, the major raw material used for production of the two types is also different. Calculations are enclosed as *Annexure 3.1*.

B. Export Price

According to Section 9A (1) (b) of the Customs Tariff Act, 1975, 'export price' in relation to an article means:

(b) "export price", in relation to an article, means the price of the article exported from the exporting country or territory and in `cases where there is no export price or where the export price is unreliable because of association or a compensatory arrangement between the exporter and the importer or a third party, the export price may be constructed on the basis of the price at which the imported articles are first resold to an independent buyer or if the article is not resold to an independent buyer, or not resold in the condition as imported, on such reasonable basis as may be determined in accordance with the rules made under sub-section (6);

Therefore, on the basis of above provisions, it may be held that the following can be considered for determination of the 'export price'.

a) Average Export Price to India and the basis of prices (e.g. FOB, CIF, FOR, etc):
b) Costs per unit after ex-factory and before exports to India that the exporters should have incurred towards items such as inland freight, insurance, taxes, etc.
c) The benefits which accrue to the exporters in the subject country on exports made to India which is not available to the exporter in case of sales in the home market.
d) Net export price after adjustments towards freight, insurance, inland freights etc.

Detailed methodology for determination of volume and value of imports has been described under Section-1 of this petition. As discussed in detail in Section-I of this petition, petitioner has relied upon transaction-wise IBIS import data to determine the volume and value of subject import into India.

Export price determined based on above discussion is enclosed as *Annexure 3.1* with the petition. It may be noted that the export price is calculated at the CIF level. According to the WTO Agreement on Anti Dumping and Indian Rules, comparison of normal value and export price should be done at same level of trade. Therefore, the export price has been adjusted for the following expenses, which may have been incurred by the exporter for exporting the material to India.

1. Ocean freight
2. Marine insurance
3. Port expenses
4. Handling charges
5. Bank charges

6. Commission

Detailed calculations of net ex-factory export price, after making necessary adjustments of the expenses after ex-factory level, are enclosed with this petition as Annexure 3.1. The Authority can make further adjustments as it deems fit.

C. Dumping Margin

According to Section 9 A (1) of the Customs Tariff Act, 'margin of dumping' is calculated in the manner given below:

(a) "margin of dumping", in relation to an article, means the difference between its export price and its normal value;

Considering the normal value and the export price determined as discussed above, dumping margin has been calculated and has been enclosed as *Annexure 3.1* with this petition. The petitioner submits that the comparison made must be considered to be a fair comparison.

Article 2.4 of AD Agreement states as under:-

"2.4 A fair comparison shall be made between the export price and the normal value. This comparison shall be made at the same level of trade, normally at the ex-factory level, and in respect of sales made at as nearly as possible the same time. Due allowance shall be made in each case, on its merits, for differences which affect price comparability, including differences in conditions and terms of sale, taxation, levels of trade, quantities, physical characteristics, and any other differences which are also demonstrated to affect price comparability.

Petitioner has determined both the normal value and export price at ex-factory level. Both the normal value and export price pertains to the same period. There are no known differences in the conditions and terms of sale. Both the prices are free of taxes. Thus, the comparison made by the petitioner constitutes a fair comparison.

It would be seen that the dumping margin is not only beyond de-minimus limits but also very significant, both for Steel Tapes and Fibre Glass Tapes, for each of the subject countries and cumulatively for the product under consideration.

Section IV
Evidence of Injury

A. Scope of domestic industry

Rule 2(b) defines domestic industry as under:-

> *"domestic industry" means the domestic producers as a whole engaged in the manufacture of the like article and any activity connected therewith or those whose collective output of the said article constitutes a major proportion of the total domestic production of that article except when such producers are related to the exporters or importers of the alleged dumped article or are themselves importers thereof in which case the term 'domestic industry' may be construed as referring to the rest of the producers ".*

The present petition is being filed by M/s. FMI Ltd. The production of the petitioner company constitutes major portion comprising about 61% of total Indian production. Further, the petition has been supported by all the other known Indian producers. The petition, therefore, satisfies the requirement of standing of the domestic industry under the AD Rules and constitutes domestic industry within the meaning of the Anti Dumping Rules.

With regard to effect of dumped imports, Annexure II (iv) to the Rules states as under: -

> *(iv) The effect of the dumped imports shall be assessed in relation to the domestic production of the like article when available data permit the separate identification of that production on the basis of such criteria as the production process, producers' sales and profits. If such separate identification of that production is not possible, the effects of the dumped imports shall be assessed by the examination of the production of the narrowest group or range of products, which includes the like product, for which the necessary information can be provided.*

Petitioner submits that information has been provided in respect of like article to the extent feasible and available.

B. Segregation of injury information

Annexure II (iv) to the Rules states as under:-

(v) the effect of the dumped imports shall be assessed in relation to the domestic production of the like article when available data permit the separate identification of that production on the basis of such criteria as the production process, producers' sales and profits. If such separate identification of that production is not possible, the effects of the dumped imports shall be assessed by the examination of the production of the narrowest group or range of products, which includes the like product, for which the necessary information can be provided.

Information has been provided in respect of like article to the extent feasible and separately available. However, in those situations where the information is not separately available in respect of the like article because separate identification of that information is not feasible, information has been provided in respect of narrowest group/range of products, which include the like article and for which the necessary information is available and can be provided.

The proposed period of investigation (POI) for the purpose of present investigation is April 2014 to March 2015 (12 months). The injury investigation period has however, been considered as the period 2011-12, 2012-13, 2013-14 and the proposed POI.

C. <u>Cumulative assessment</u>

Exporters from a number of countries are dumping subject goods in the Indian market. Annexure II (iii) of the Anti Dumping Rules provides that in case imports of a product from more than one country are being simultaneously subjected to anti dumping investigations, the designated authority will cumulatively assess the effect of such imports, in case it determines that: -

(a) the margin of dumping established in relation to the imports from each country is more than two percent expressed as percentage of export price and the volume of the imports from each country is three percent of the imports of the like article or where the export of the individual countries is less than three percent, the imports cumulatively accounts for more than seven percent of the imports of like article, and;

(b) cumulative assessment of the effect of imports is appropriate in light of the conditions of competition between the imported article and the like domestic articles.

Followings are relevant in this regard:-

(a) The margins of dumping from each of the subject countries are more than the limits prescribed above;

(b) The volume of imports from each of the subject countries is more than the limits prescribed;

(c) Cumulative assessment of the effects of imports is appropriate since the exports from the subject countries directly compete with the like goods offered by the domestic industry in the Indian market.

In view of the above, petitioner considers that cumulative assessment of the effects of imports is appropriate. The Authority is, therefore, requested to assess injury to the domestic industry cumulatively from the subject countries.

D. <u>Injury to the domestic industry</u>

Meaning of injury: Annexure-II to the Rules provides as follows with regard to injury to the domestic industry:

A determination of injury shall involve an objective examination of both (a) the volume of the dumped imports and the effect of the dumped imports on prices in the domestic market for like article and (b) the consequent impact of these imports on domestic producers of such products.

Annexure II to the Anti Dumping Rules in its relevant part provides as follows with regards to injury to domestic industry:

> *(iv) The examination of the impact of the dumped imports on the domestic industry concerned, shall include an evaluation of all relevant economic factors and indices having a bearing on the state of the industry, including natural and potential decline in sales, profits, output, market share, productivity, return on investments or utilization of capacity; factors affecting domestic prices; the magnitude of the margin of dumping; actual and potential negative effects on cash flow, inventories, employment, wages, growth, ability to raise capital investments.*

The WTO Agreement provides as follows:

> *3.4 The examination of the impact of the dumped imports on the domestic industry concerned shall include an evaluation of all relevant economic factors and indices having a bearing on the state of the industry, including actual and potential decline in sales, profits, output, market share, productivity, return on investments, or utilization of capacity; factors affecting domestic prices; the magnitude of the margin of dumping; actual and potential negative effects on cash flow, inventories, employment, wages, growth, ability to raise capital or investments. This list is not exhaustive, nor can one or several of these factors necessarily give decisive guidance.*

Petitioner has undertaken an analysis of all economic factors and indices of the domestic industry having a bearing on the state of the domestic industry and has

examined the impact of dumped imports on domestic industry in the manner prescribed by the Act, Rules and WTO Agreement.

I. Assessment of Demand/Apparent Consumption

Petitioner has defined, for the purpose of the present petition, demand or apparent consumption of the product in India as the sum of domestic sales of Indian producers and imports from all sources. The demand so assessed can also be seen in Proforma-IV-A enclosed with the petition and the table below.

It would be seen that the demand for the product under consideration has been consistently increasing and shows a positive trend.

Table 5: Demand/ consumption

Particulars	Unit	2011-12	2012-13	2013-14	POI*
Demand	MT	2,774	3,659	3,805	4,845
Malaysia	MT	17	19	42	79
Chinese Taipei	MT	130	438	329	928
Thailand	MT	104	216	367	411
Vietnam	MT	427	486	554	741
Subject countries	MT	678	1,159	1,292	2,159

Sales of Indian producers	MT	1,979	2,387	2,491	2,539

**Proposed POI is April 2014 – March, 2015*

II. Volume effects of dumped imports

With regard to volume of imports and its effect on the domestic prices, the Rules further provide as follows –

> *(i) While examining the volume of dumped imports, the said authority shall consider whether there has been a significant increase in the dumped imports, either in absolute terms or relative to production or consumption in India. With regard to the effect of the dumped imports on prices as referred to in sub-rule (2) of rule 18 the designated authority shall consider whether there has been a significant price under cutting by the dumped imports as compared with the price of like product in India, or whether the effect of such imports is otherwise to*

depress prices to a significant degree or prevent price increase which otherwise would have occurred, to a significant degree.

In the present case, the volume of exports from the subject countries has increased continuously during the injury period. Further, there has been significant price undercutting by the dumped imports as compared with the price in India. As a consequence of such imports, domestic industry was restrained from increasing domestic prices (to maintain sales volumes) which would have otherwise increased to a significant degree.

a. Import volumes and market share in imports

With regard to volume of the dumped imports, the Designated Authority is required to consider whether there has been a significant increase in dumped imports either in absolute terms or relative to production or consumption in India. Volume of dumped imports from the subject country has been provided is enclosed as Proforma IV-A.

It is submitted that volume of imports from subject countries as a whole has increased significantly in absolute terms, as well as in relation to production and demand in India. Total volume of imports from subject countries has increased more than thrice since 2011-12. Imports from subject countries comprise almost 94% of total imports of subject goods coming into India in the POI. Further, imports in relation to production and consumption in India have also increased significantly over the injury period.

Table 6: Import Volume and Market share

Particulars	Unit	2011-12	2012-13	2013-14	POI*
Import Volumes					
Malaysia	MT	17	19	42	79
Chinese Taipei	MT	130	438	329	928
Thailand	MT	104	216	367	411
Vietnam	MT	427	486	554	741
Subject countries - Total	MT	678	1,159	1,292	2,159
China-attracting ADD	MT	32	18	21	146
Other Countries	MT	85	96	1	1
Total Imports	MT	795	1,273	1,314	2,306
Market Share in Imports					
Malaysia	%	2.09	1.53	3.18	3.44
Chinese Taipei	%	16.40	34.38	25.01	40.23
Thailand	%	13.12	16.95	27.96	17.83
Vietnam	%	53.67	38.16	42.19	32.15

Subject countries -Total	%	85.29	91.03	98.35	93.65
China-attracting ADD	%	4.06	1.44	1.59	6.33
Other Countries	%	10.66	7.54	0.06	0.03
Total Imports	%	100.00	100.00	100.00	100.00
Subject Imports in relation to Production	%	55%	76%	91%	128%
Subject Imports in relation to Demand	%	24%	32%	34%	45%

**Proposed POI is April 2014 – March, 2015*

a) **Market share in demand**

It may be seen that the market share of the subject countries has increased sharply over the injury period from 24% in 2011-12 to 45% in the proposed POI which is almost twice in percentage. On the other hand, market share of Indian producers has declined from 71% in 2011-12 to 52% in the proposed POI. Market share of China (attracting anti dumping duty) has increased, whereas market share of other countries has declined.

Table 7: Market Share in Demand

Market Share in Demand	Unit	2011-12	2012-13	2013-14	POI*
Malaysia	%	0.60	0.53	1.10	1.64
Chinese Taipei	%	4.70	11.96	8.64	19.15
Thailand	%	3.76	5.90	9.66	8.49
Vietnam	%	15.38	13.27	14.57	15.30
Subject countries - Total	%	24.44	31.66	33.96	44.57
China-attracting ADD	%	1.16	0.50	0.55	3.01
Other Countries	%	3.05	2.62	0.02	0.01
Domestic industry	%	38.09	34.61	34.49	30.29
Supporters	%	33.25	30.61	30.98	22.12
Indian Producers	%	71.34	65.22	65.47	52.40

**Proposed POI is April 2014 – March, 2015*

b. **Conclusion on Volume Effect**

It would be seen that there has been a significant increase in the dumped imports, both in absolute terms and relative to production or consumption in India over the injury period. It would be evident from Proforma-IV-A that market share in demand of the subject countries, as well as market share in total imports has increased over the proposed injury period.

III. Price Effect

With regard to the effect of the dumped imports on prices, Annexure II (ii) of the Rules lays down as follows:

> *"With regard to the effect of the dumped imports on prices as referred to in sub-rule (2) of rule 18 the Designated Authority shall consider whether there has been a significant price undercutting by the dumped imports as compared with the price of like product in India, or whether the effect of such imports is otherwise to depress prices to a significant degree or prevent price increase which otherwise would have occurred to a significant degree."*

a. Price Undercutting

Petitioner has determined net sales realization of domestic industry considering selling price, excluding taxes & duties, rebates, discounts & commissions and freight & transportation. Entire domestic sales volume of the domestic industry has been included in the calculations. Landed price of imports has been determined considering weighted average CIF import price, with 1% landing charges and applicable basic customs duty and cess on basic customs duty.

Details of price undercutting and price depression/suppression have been analyzed and are enclosed in Proforma IV-B.

Price undercutting has been worked out by comparing the landed price of imported goods from each of the subject countries, as well as cumulatively, with the net sales realization of the domestic industry for the injury period. It would be seen that the landed price of imports is below the selling price of the domestic industry. Thus, the imports are undercutting the domestic prices.

Table 8: Price Undercutting

Particulars	**Unit**	**2011-12**	**2012-13**	**2013-14**	**POI***
Net sales realization of Domestic Industry	Rs./KG Indexed	*100*	*104*	*106*	*108*
Subject countries					
Landed Price	Rs./KG	87.66	115.38	110.81	90.68

Price Undercutting	Rs./KG	***	***	***	***
Price Undercutting	Range %	65-70%	60-65%	55-60%	65-70%

**Proposed POI is April 2014 – March, 2015*

b. Price Depression/Suppression

Even though the level of price undercutting is significant and per se sufficient to justify imposition of anti dumping duty, petitioner further examined whether the effect of such imports was to depress prices to a significant degree or prevent price increases which otherwise would have occurred to a significant degree. It would be seen from the table below that the imports are suppressing the prices of the domestic industry in the market. The selling price shows an overall increase of only 8% over the injury period despite the cost of sales having increased by 17%.

It can also be seen that landed price of subject imports has remained below not only net sales realization, but also below cost of sales during the entire injury period.

Comparison of cost of production and selling price shows as follows:

Table 9: Price Suppression

Particulars	**Unit**	**2011-12**	**2012-13**	**2013-14**	**POI***

Indexed		*100*	*104*	*106*	*108*

**Proposed POI is April 2014 – March, 2015*

c. Conclusion on price effect

It would thus be seen that domestic subject goods are facing price undercutting due to low landed prices of dumped subject imports. The domestic industry is unable to increase selling prices in proportion to increase in cost of sales, due to presence of low priced subject imports in the market.
The dumped imports have significant injurious price effect on the performance of the domestic industry which requires urgent imposition of anti dumping duty in order to curb dumping and consequent injury to the domestic industry.

IV. Economic parameters relating to the domestic industry

Annexure II to the Rules requires that a determination of injury shall involve an objective examination of the consequent impact of these imports on domestic producers of such products. With regard to consequent impact of these imports on domestic producers of such products, the Rules further provide that the examination of the impact of the dumped imports on the domestic industry should include an objective and unbiased evaluation of all relevant economic factors and indices having a bearing on the state of the industry, including actual and potential decline in sales, profits, output, market share, productivity, return on investments or utilization of capacity; factors affecting domestic prices, the magnitude of the margin of dumping; actual and potential negative effects on cash flow, inventories, employment, wages, growth, ability to raise capital investments.

It would be seen from the analysis of all the parameters mentioned above that the domestic industry has continued to suffer injury despite anti dumping duty.

a) Production, Capacity, Capacity utilization and Sales

Performance of the domestic industry in respect of these parameters may be seen in Proforma-IV-A enclosed. It would be seen from the table below that:

i) Capacity has remained constant over the injury period.
ii) Production of domestic industry has increased in 2012-13 and then declined in 2013-14. However, the production increased once again in the proposed POI.
iii) Capacity utilization has followed the same trend as production. However, capacity utilization has remained low over the entire injury period.
iv) Domestic sales volume has increased over the injury period. However, the rate of increase in domestic sales volume of the domestic industry is far lower than the rate of increase in demand.

Table 10: Production, capacity utilization, and sales volume

Particulars	Unit	2011-12	2012-13	2013-14	POI*
Capacity	MT	2,400	2,400	2,400	2,400
Production	MT	1,235	1,521	1,412	1,681
Capacity Utilization	%	51	63	59	70
Domestic Sales Volume	MT	1,057	1,267	1,312	1,467
Demand	MT	2,774	3,659	3,805	4,845

**Proposed POI is April 2014 – March, 2015*

b) Inventories

Inventories with the Domestic Industry have increased up to 2013-14 and then declined in the proposed POI, as would be seen from Proforma IV-A enclosed.

Table 11: Inventories

Particulars	Unit	2011-12	2012-13	2013-14	POI*
Average Inventory	MT	25	47	50	29

**Proposed POI is April 2014 – March, 2015*

c) Profitability, Cash Flow and Return on Investment (ROI)

Information on profitability, return on investment and cash profits of the domestic industry is given in the enclosed Proforma IV-A. It would be seen from Table below that:

i) Profit per unit and cash profits have declined significantly over the injury period.

ii) The return on capital employed has also seen a severe decline over the injury period.

iii) The severe decline in profitability is due to the fact that domestic industry is unable to increase selling prices in proportion to increase in cost of sales. Resultantly, the domestic industry has incurred negligible profits in the POI.

iv) The domestic industry is forced to keep selling prices disproportionately low due to presence of dumped subject imports in the market.

v) This decline in profitability is despite increase in production and sales volumes of domestic industry.

vi) This shows that the increase in production and sales volumes is only because domestic industry tried to combat the price injury they were suffering by increasing sales, even if they were selling at suppressed prices.

vii) Thus, it is apparent that the domestic industry has been able to maintain sales volume and market share only by accepting decline in profitability.

viii) The landed price of subject imports has been below the cost of sales and net sales realization of the domestic industry throughout the injury period.

Table 12: Profitability

Particulars (Indexed)	Unit	2011-12	2012-13	2013-14	POI*
Cost of sales	Rs./Kg	*100*	*111*	*114*	*117*
Selling price	Rs./Kg	*100*	*104*	*106*	*108*

**Proposed POI is April 2014 – March, 2015*

Here it is pertinent to refer the case of Forum of Acrylic Fibre Manufacturers v. Designated Authority[1], wherein the Hon'ble Tribunal appropriately dealt with the relevance and importance of profits. The relevant extract of the decision is reproduced herein below –

> *"9.1 ...The phenomenon of price determination is inextricably linked with the market processes. The market determines the prices of factors of production in the same way in which it determines the prices of consumer goods. In a market economy the relationship between the price of a good and the quantity supplied depends on the cost of making it. Prices are considered to be determined simultaneously by cost and demand considerations. Any price determined on a market is the necessary outgrowth of the interplay of the forces operating, i.e., demand and supply. Whatever, the market situation which generated this price may be, with regard to it, the price is always adequate, genuine and real. It cannot be a higher price if no bidder ready to offer a higher price turns up, and it cannot be lower, if no seller ready to deliver at a lower price turns up. Only appearance of such people ready to buy or sell can alter prices. It is the very essence of prices that they are the offshoot of the actions of individuals and groups of individuals acting on their behalf. Prices are generated by the market processes and are the pith of market economy and there is no such thing as prices outside the market, nor can prices be constructed synthetically. They are the resultant of a certain constellation of market data, of actions and reactions of the members of a market society. Prices are by definition, determined by peoples' buying and selling or abstention from buying and selling. Thus, assuming that there is sufficient demand in the domestic market for all the dumped imports offered for sale, the price of such dumped imports will have a direct bearing on the price of the like products of the domestic industry.*
>
> *In a market economy the things that can be sold for money consideration are marked with money prices. The driving force of the market processes is*

[1] *Refer, Final Order Nos. 34-35/2006-AD, dated 2-8-2006, in Appeal Nos. C/848-849/2005-AD*

provided by the promoting and speculating entrepreneurs who are intent upon profiting by taking advantage of differences in prices. The profit element in price is an important life line for continuance of entrepreneurial activity required for industrial production. Theory of profit, however, has remained one of the most unsatisfactory and controversial division of economic doctrines. The theory recognizes that profits arise for several reasons. First, the innovator who introduces a more efficient new technique can produce at a cost below the market price and thus earn entrepreneurial profits. Secondly, changes in consumer tastes may cause revenues of some producers to increase giving rise to windfall profits. The third type of profit is monopoly profit, which occurs when the producer restricts output so as to prevent prices from falling to the level of costs. In the business usage, the excess of revenue over total cost during a specified period of time is profit. In economics, profit is the excess over the returns on capital, land and labor. To the economist, much of what is classified in business usage as profit, consists of the implicit wages of manager-owners, the implicit rent on land owned by the producer and the implicit interest on the capital invested by the owner producer. Profit in short, is yield minus costs. In the monetary calculus profit appears as a surplus of money received over money expended, and loss as a surplus of money expended over money received. Profit and loss can be expressed in definite amounts of money. An excess of total amount of profits over that of losses is a proof of the fact that there is economic progress and an improvement in the standard of living of all strata of the population. Capital does not beget profit and profit is not necessarily related to or dependent on the amount of capital employed by the entrepreneur. Profit and loss depend upon the success or failure of the entrepreneur to adjust production to the demand of consumers. The amount of money to be invested in every branch of profit-seeking industrial venture is regulated by the behavior of consumers. Production for profit is necessarily for use, as profits can only be earned by providing the consumer with those things, which they most urgently want to use. A fortiori, when consumers get diverted to buying dumped imports at prices lower than the non-injurious price, the domestic industry can hold them back only at injurious price levels that would deny them reasonable profit. This would be relevant on the aspect of injury so long the injury margin is lower than the dumping margin, otherwise of course, dumping margin will alone be relevant where it is lower than the injury margin."

In the light of the observation of the Hon'ble Tribunal in the previously mentioned case and on the basis of the information on record, it can very well be understood that the domestic industry is suffering in terms of profitability.

d) Employment and Wages

Given the fact that the petitioner is a multi-product company and considering the labor laws in the country, these parameters may not show current and potential adverse impact of dumping. Employment and wages have increased over the injury

period whereas productivity has increased up to 2012-13, declined in the 2013-14 and then increased in the proposed POI.

Table 13: Employment, wages and productivity

Particulars *(Indexed)*	**Unit**	**2011-12**	**2012-13**	**2013-14**	**POI***
No. of Employees	Nos	*100*	*112*	*111*	*115*
Wages	Rs. Lacs	*100*	*158*	*142*	*181*
Wages per Unit	Rs./Kg	*100*	*128*	*125*	*133*
Productivity					
Per Day	MT	3.53	4.34	4.04	4.80
Per Employee	MT	*100*	*110*	*103*	*119*

**Proposed POI is April 2014 – March, 2015*

e) Growth

Information with respect to growth of various parameters is given in the enclosed Proforma IV-A. It would be seen volume parameters such as production, capacity utilization and sales volume show a positive growth. However, the domestic industry has registered a negative growth in terms of price parameters such as profits and return on investment as well as market share.

Table 14: Growth parameters

Growth	**Unit**	**2011-12**	**2012-13**	**2013-14**	**POI***

Cost of sales	Rs./Kg	-	***	***	***
Selling price	Rs./Kg	-	***	***	***
Profit/Loss	Rs./Kg	-	***	***	***
Return on Investment	%	-	***	***	***
Market Share	%	-	-3.48	-0.12	-4.21

**Proposed POI is April 2014 – March, 2015*

f) Ability to raise capital investments

Given the state of affairs of the domestic industry where running the product is consistently not performing well because of persistent dumping over last few years, substantial fresh investments cannot even be imagined. In any case, existing capacities are sufficient to meet the current demand for the product in the Country. No fresh investments are being planned by the domestic industry for capacity enhancement.

g) Factors affecting domestic prices

Taking into consideration the import prices of subject goods from dumping countries and other countries, change in the cost structure, competition in the domestic market, factors other than dumped imports that might be affecting the prices of the domestic industry in the domestic market; it would show that the landed value of imported material from the subject countries and other dumping sources are significantly below the selling price of the domestic industry, causing severe price undercutting in the Indian market. Average import price from the subject countries is much lower than the non-injurious price of the domestic industry. The benchmark for the Indian producers to price their product is the import prices from the subject countries. Demand for the product has shown significant jump during the injury period and therefore cannot be a factor responsible for price suppression faced by the domestic industry.

It is, thus, evident that the only factor responsible for the decline in domestic industry's prices is the low import prices (dumping prices) of the product from the subject country and the high cost of production of the domestic industry. As per Proforma IV-A, it would be seen that whereas the cost of production increased, the import prices were much lower than the domestic prices and, therefore, prevented the domestic industry from increasing their prices in line with the increase in the cost.

h) Level of dumping & dumping margin

As discussed in Section III of the petition, the dumping margin is not only more than de minimus but also very substantial.

E. <u>Conclusions on injury</u>

It would thus be seen that the domestic industry suffered material injury, as summarized below:

a) Subject imports have increased in absolute terms, as well as in relation to production and consumption in India.
b) Imports are significantly undercutting the prices of the domestic industry.
c) The landed price of imports is not only below selling price of the domestic industry but also below cost of production and non-injurious price of the domestic industry.
d) Both dumping margin and injury margin in the current POI from each of the subject countries are positive and significant.
e) Imports are suppressing the prices of the domestic industry and preventing the price increases that would have occurred in the absence of dumping.
f) Performance of the domestic industry has deteriorated significantly in terms of profits, return on investments and cash flow over the proposed injury period.

g) Increase in production and sales volumes is only because domestic industry tried to combat the price injury they were suffering by increasing sales, even if the sales were at suppressed prices.
h) The domestic industry has been able to maintain sales volume only by accepting decline in profitability.
i) Growth of the domestic industry is adverse in terms of a number of parameters.

The various parameters relating to domestic industry collectively and cumulatively show that the domestic industry has suffered material injury from dumped imports.

F. Threat of material injury

In addition to the material injury already inflicted on the domestic industry, imports from subject countries are posing threat of material injury to the domestic industry. *Annexure II to the Rules provides as under in this regard.*

> *"A determination of a threat of material injury shall be based on facts and not merely on allegation, conjecture or remote possibility. The change in circumstances which would create a situation in which the dumping would cause injury must be clearly foreseen and imminent. In making a determination regarding the existence of a threat of material injury, the Designated Authority shall consider, inter-alia, such factors as*
>
> *(a) a significant rate of increase of dumped imports into India indicating the likelihood of substantially increased importation;*
>
> *(b) sufficient freely disposable or an imminent, substantial increase in capacity of the exporter indicating the likelihood of substantially increased dumped exports to Indian market, taking into account the availability of other export markets to absorb any additional exports;*
>
> *(c) whether imports are entering at prices that will have a significant depressing or suppressing effect on domestic prices, and would likely increase demand for further imports; and,*
>
> *(d) inventories of the article being investigated.*

In the instant case,

1. Imports have increased in significant volumes.
2. The price undercutting is significant. The imports are entering at such prices that there is strong likelihood of further importation.

Thus, in addition to material injury already suffered, the domestic industry is threatened with material injury due to dumped imports.

Section V
Evidence of Causal Link

Causal Link under the Rules

Article 3.5 of the AD Agreement deals with injury to the domestic industry and is stated as under: -

> *"3.5 It must be demonstrated that the dumped imports are, through the effects of dumping, as set forth in paragraphs 2 and 4, causing injury within the meaning of this Agreement. The demonstration of a causal relationship between the dumped imports and the injury to the domestic industry shall be based on an examination of all relevant evidence before the authorities. The authorities shall also examine any known factors other than the dumped imports, which at the same time are injuring the domestic industry, and the injuries caused by these other factors must not be attributed to the dumped imports. Factors which may be relevant in this respect include, inter-alia, the volume and prices of imports not sold at dumping prices, contraction in demand or changes in the patterns of consumption, trade restrictive practices of and competition between the foreign and domestic producers, developments in technology and the export performance and productivity of the domestic industry."*

Paragraph (v) of Annexure II of AD Rules reads as under:

> *"(v) It must be demonstrated that the dumped imports are, through the effects of dumping, as set forth in paragraphs (ii) and (iv) above, causing injury to the domestic industry. The demonstration of a causal relationship between the dumped imports and the injury to the domestic industry shall be based on an examination of relevant evidence before the designated authority. The designated authority shall also examine any known factors other than the dumped imports, which at the same time are injuring the domestic industry, and the injury caused by these other factors must not be attributed to the dumped imports. Factors which may be relevant in this respect include, inter alia, the volume and prices of imports not sold at dumping prices, contraction in demand or changes in the patterns of consumption, trade restrictive practices of and competition between the*

foreign and domestic producers, developments in technology and the export performance and the productivity of the domestic industry."

Petitioner submits that there exists a causal relationship between the dumping of subject goods by the subject countries and injury being incurred by the domestic industry, as would be seen from the submissions below.

1. **Volume and value of imports from countries other than the subject countries and explanation on why imports from these countries are not causing injury to the domestic industry.**

Statement of imports from various countries is enclosed with this petition. It would be seen that the imports of product under consideration from other countries are either negligible in volume or are already attracting anti dumping duties. Therefore, imports from other countries are not causing injury to the domestic industry.

2. **Demand of the product for the past three years including the current year. In case the demand has undergone substantial change, an explanation on why changes in the demand have not caused injury to the domestic industry.**

The demand of the product under consideration has shown positive growth. Contraction in demand is not a possible reason, which could have contributed to injury to the domestic industry.

3. **Provide explanation on whether trade restrictive practices of and competition between the foreign and domestic producers, developments in technology, the export performance or the productivity of the domestic industry or any other known factors have not caused injury to the domestic industry.**

Injury to the domestic industry has been caused by the dumped imports. Further, injury, if any, due to other factors has been segregated by the petitioner, as discussed in detail herein below.

i. **Listed known other factors**: - Article 3.5 of the Agreement dealing with injury to the domestic industry states as under: -

3.5 It must be demonstrated that the dumped imports are, through the effects of dumping, as set forth in paragraphs 2 and 4, causing injury within the meaning of this Agreement. The demonstration of a causal relationship between the dumped imports and the injury to the domestic industry shall be based on an examination of all relevant evidence before the authorities. The authorities shall also examine any known factors other than the

dumped imports, which at the same time are injuring the domestic industry, and the injuries caused by these other factors must not be attributed to the dumped imports. Factors which may be relevant in this respect include, inter-alia, the volume and prices of imports not sold at dumping prices, contraction in demand or changes in the patterns of consumption, trade restrictive practices of and competition between the foreign and domestic producers, developments in technology and the export performance and productivity of the domestic industry.

ii. **Injury due to other listed known factors**: It may be seen that the above provisions list some of the other factors, which could have caused injury to the domestic industry. It is submitted that these other known listed factors have not caused injury to the domestic industry, as established below: -

(1) **Changes in the patterns of consumption**: - The pattern of consumption with regard to the product under consideration has not undergone material change against the product under consideration. This is clearly established by significant increase in demand for the product in the country. Changes in the pattern of consumption could not have, therefore, contributed to the injury to the domestic industry.

(2) **Trade restrictive practices of and competition between the foreign and domestic producers:** - There is no trade restrictive practice, which could have contributed to the injury to the domestic industry.

(3) **Developments in technology**: - Technology for production of the product has not undergone any change. Developments in technology are, therefore, not a factor of injury.

(4) **Export performance**: The claimed injury to the domestic industry is on account of domestic operations. Petitioner has provided costing and injury information for domestic sales separately. Hence, claimed injury to domestic industry cannot be attributed to exports.

(5) **Performance of other products being produced and sold by the domestic industry**: Claimed injury to the domestic industry is on account of product under consideration. The petitioner has provided information which pertains only to the product under consideration. Petitioner has not included any information for other products. Thus, the financial information provided with regard to product under consideration clearly shows the position of the domestic industry with regard to like article produced and sold by the domestic industry.

Factors establishing Causal Link

While the above parameters establish that injury to the domestic industry has not been caused by the other factors, petitioner submits that the following parameters establish that there exists a causal relationship between dumping of the subject goods by the subject countries and injury being caused to the domestic industry:

a. Imports are undercutting the prices of the domestic industry.
b. Further, the landed price of imports is below not only non-injurious price and selling price of the domestic industry but also below cost of sales of the domestic industry. Resultantly, the domestic industry is faced with price suppression in the market.
c. The domestic industry has suffered severe injury on account of market share, profits, return on investment and cash flow as a result of dumping of the product under consideration in India.
d. Growth of the domestic industry is adverse in terms of price parameters. Though sales volume, production and capacity utilization have increased in the POI, capacity utilization has remained sub-optimal.

It can, thus, be seen that the injury to the domestic industry has been caused by the dumped imports from the subject countries.

Section VI
COSTING INFORMATION

1. **Production Process: Stage wise process of manufacturing and various routes of manufacture. Process flow chart indicating cycle time taken at each process.**

   Enclosed

2. **Raw materials and packing materials consumption and reconciliation statement as per Format 'A'.**

   Enclosed Format A- Confidential

3. **Raw materials consumption norms and comparison with actuals as per Format 'B'.**

   Enclosed Format B- Confidential

4. **A statement showing cost of production as per Format "CI and CII". A statement classifying expenses shown in Format "CI" into Fixed, Variable and Semi-variable. The semi-variable expenses may further be classified into Fixed and Variable. The basis of classification may be clearly mentioned.**

   Enclosed Formats CI and CII-Confidential

5. **Utilities consumption statement as per Format "D" for the investigation period and previous three years.**

   Enclosed Format D- Confidential

6. **Calculations of working capital :**

   a) **Working Capital as per Balance Sheet.**
   b) **Working Capital as per Bank Limits.**
   c) **Working Capital as per Production Cycle Time.**

   As per Annual Report enclosed.

7. **Interest on Term Loans: Statement of term loan outstanding at the beginning of the year, at the end of the year, interest paid/ payable on term loans and average rate of interest on term loans.**

   As per Annual Report enclosed.

8. **Overdue and/ or compounding interest: Statement showing details of overdue and/ or compounding interest provided in the annual audited accounts relevant to the period of investigation.**

   As per Annual Report enclosed.

9. **Depreciation: Statement showing gross and net blocks for the investigation period and previous year.**

   As per Annual Report enclosed.

10. **Return/profit: Statement showing desirable return on capital/equity along with justification in support thereof.**

    The petitioner expects ***% return on gross fixed assets.

11. **Details of misc. income earned during the year.**

    As per Annual Report enclosed.

12. **Sales Realization: A statement showing details of gross sales realization, discounts/ commission, excise duty, other taxes and net sales realization, as per Format "E" for the past three years and month wise for the investigation period. The figures should reconcile with balance sheet of the corresponding years.**

Enclosed Format E-Confidential

13. **Details of WIP at the beginning and end of the investigation period, clearly indicating break up of material cost and overheads charged in the valuation.**

As per Annual Report enclosed.

14. **Brief write up on the following:**

(a) Purchase policy including long terms contracts for major materials

Purchase of Major Raw Material and Components, are made from Approved Suppliers on re-order level basis. If Company wants to purchase from non-approved supplier then first of all quotations are called, reviewed, samples reviewed by Manager Purchase, if found satisfactory then negotiations for rates are carried out to finalize the price. Selection Criteria of Suppliers generally consists of some facts as Reputed Name/Brand, ISO Certification, Satisfactory Supply History/Past Experience, Lower Prices and Quality System approved by a recognized body to an appropriate standard. Purchases are made on Credit of *** to *** Days.

(b) Sale Policy indicating marketing/ distribution channels, commission/discount policy, credit terms etc., sales policy to bulk consumers.

Major sales are made to regular suppliers/agents. The Company has appointed Agents to different States and Cities in the country to whom Commission is paid. Sales are made on a credit period of up to *** days. The Company offers **% discount against payments received in advance from customers as Cash Discount. Trade discount is offered depending upon the ordered quantity subject to minimum quantity of *** pcs per order.

(c) Stores accounting and inventory/ stock/ WIP Valuation.

(i) Stores & spares, packing material & others are valued at lower of cost and net realizable value.

(ii) Finished goods, Raw Material, Components & Stores & Spares, Work-in-progress, Stock of trading items & goods lying at port & in transit are valued at cost.

(iii) Scrap is valued at realizable value.
(iv) Capital work in progress is valued at cost. Cost includes cost of Land Material, and construction services relating to construction.
(v) Land is valued at cost and cost includes cost of acquisition and all related costs.

(d) Quality control procedure and tests being conducted.

Material is being checked at three stages:
1) At Incoming Stage: All incoming material is being checked at receiving stage as per parameters mentioned in Receiving Inspection Plan.
2) At In-Process Stage: All the products are being checked at in-process stage as per parameters mentioned in respective in process inspection plan.
3) At Finish Stage: Similarly Finished Products are checked at Final Stage as per Parameters mentioned in Final Inspection Plan.

15. A statement showing Production, Sales Quantities, Capacity Utilization, Stock, Net Average Sales Realization, Cost of Production, Profit/ Loss for the past three years and month wise for the period of investigation.

As per Proforma IV A enclosed.

16. Details of job work done or got done during the investigation period.

NIL

17. Audited and printed annual accounts for the investigation period and past three years.

Enclosed.

Sub.: Dumping of Measuring Tapes in India from Chinese Taipei, Malaysia, Thailand & Vietnam

Sir,

We are hereby filing petition in the form and manner prescribed for initiation of anti-dumping investigations and imposition of appropriate anti-dumping duties on dumped imports of Measuring Tapes from Chinese Taipei, Malaysia, Thailand & Vietnam. We have provided all relevant information in the enclosed petition. We are, however, willing to provide any further information which you may require in this connection. We have no objection to any verification which you may wish to carry out at our premises in this regard.

In view of dumping being faced by the domestic industry, we request you to kindly initiate the investigations and recommend imposition of anti dumping duty at the earliest, so that the legitimate interests of the Indian producers are protected. We also request recommendation of interim duties, pending detailed investigations.

We have authorized following firm to represent us in this matter.

Mr. A K Gupta, Mr. Praveen Khandelwal, Mr. Rajesh Sharma,
Mr. K N Kothari, Ms. Rajkumari Gurbaxani

TPM Consultants have been authorized, inter-alia, for the followings:

a) to receive communication from the Designated Authority on our behalf;
b) to make submissions on our behalf;
c) to appear for and on our behalf.

We hereby certify that the information provided by us in respect of our company is true, complete and correct, on the basis of records available and generally maintained by the company, and no material information has been concealed or misrepresented.

We certify that our company has not imported the subject product from the subject countries either directly or through an affiliated company. Further, our company is not related either to a producer-exporter of the subject product in these countries or an importer in India within the meaning of Rule 2(b) of Anti Dumping Rules.

With regards,

Yours Sincerely,

Sub.: Dumping of Measuring Tapes in India from Chinese Taipei, Malaysia, Thailand & Vietnam

Sir,

This has reference to the anti dumping investigations in the above matter based on a petition filed by M/s. FMI Ltd. for imposition of anti-dumping duties on dumped imports of Measuring Tapes from Chinese Taipei, Malaysia, Thailand & Vietnam. This is to inform you that we are a domestic producer of Measuring Tapes in India. We fully support the petition filed before you for imposition of anti dumping duty. We agree with the petitioner that imposition of anti dumping duty on imports of Measuring Tapes is necessary to prevent dumping and injury caused thereby. We, therefore, request you to impose appropriate anti dumping duty on such dumped imports at the earliest.

We hereby certify that the information provided by us in respect of our company is true, complete and correct, on the basis of records available and generally maintained by the company, and no material has been concealed or misrepresented. Further, we have not imported Measuring Tapes from any of the subject countries during the entire period mentioned above. Nor we are related to any producer/exporter outside India or an importer in India.

With regards,

Yours sincerely,

Chanderjeet Singh

ANNEXURE 6

Costing Information & Annual Reports

Section VI
COSTING INFORMATION

1. **Production Process: Stage wise process of manufacturing and various routes of manufacture. Process flow chart indicating cycle time taken at each process.**

   - Enclosed with confidential version

2. **Raw materials and packing materials consumption and reconciliation statement as per Format 'A'.**

   - Enclosed

3. **Raw materials consumption norms and comparison with actuals as per Format 'B'.**

   - Enclosed

4. **A statement showing cost of production as per Format "CI and CII". A statement classifying expenses shown in Format "CI" into Fixed, Variable and Semi-variable. The semi-variable expenses may further be classified into Fixed and Variable. The basis of classification may be clearly mentioned.**

   - Enclosed

5. **Utilities consumption statement as per Format "D" for the investigation period and previous three years.**

   - Enclosed

6. **Calculations of working capital as follows:**

   a) Working Capital as per Balance Sheet: Enclosed.
   b) Working Capital as per Bank Limits. Working capital as per Bank limits is Rs. ***

c) Working Capital as per Production Cycle Time.

7. **Interest on Term Loans: Statement of term loan outstanding at the beginning of the year, at the end of the year, interest paid/ payable on term loans and average rate of interest on term loans.**

   - As per balance sheet

8. **Overdue and/ or compounding interest: Statement showing details of overdue and/ or compounding interest provided in the annual audited accounts relevant to the period of investigation.**

   - There is no overdue or compounding interest.

9. **Depreciation: Statement showing gross and net blocks for the investigation period and previous year.**

   - As per balance sheet

10. **Return/profit: Statement showing desirable return on capital/equity along with justification in support thereof.**

    - The company expects **% return on investment on gross fixed assets basis.

11. **Details of misc. income earned during the year.**

    - As per balance sheet

12. **Sales Realization : A statement showing details of gross sales realization, discounts/ commission, excise duty, other taxes and net sales realization, as per Format "E" for the past three years and month wise for the investigation period. The figures should reconcile with balance sheet of the corresponding years.**

    - Enclosed

13. **Details of WIP at the beginning and end of the investigation period, clearly indicating break up of material cost and overheads charged in the valuation.**

- Enclosed.

14. Brief write up on the following:

(a) Purchase policy including long terms contracts for major materials
(b) Sale Policy indicating marketing/ distribution channels, commission/discount policy, credit terms etc., sales policy to bulk consumers.
(c) Stores accounting and inventory/ stock/ WIP Valuation.
(d) Quality control procedure and tests being conducted.

- Enclosed

15. A statement showing Production, Sales Quantities, Capacity Utilization, Stock, Net Average Sales Realization, Cost of Production, Profit/ Loss for the past three years and month wise for the period of investigation.

- Enclosed

16. Details of job work done or got done during the investigation period.

- There is no job work done or got done.

17. Audited and printed annual accounts for the investigation period and past three years, and trial balance for the investigation period.

- Enclosed
